Meeting 8

Updates

Wrote a bunch of code to modularize DB connection.

Didn't test it till last night.

Code does not work. :(

Modularization is a bigger task then I anticipated, need to think it out more.

OOP vs Parameter Passing

Future

Robotics is over on Saturday. Free from anything but work.

3 full weeks of just school work remaining.

Final Stop Date? Before or After Finals?

Need to set harder goals for the next 3 weeks.

Query Structure

- Will mimic DB Project
- Hooks written in Python
  - Allows for support within any enpoint handler/web-server
  - Django Compatible
  - AWS Compatible
  - Write the code once, use anywhere
